

# Commercialon® Premium Carpet Seam Sealer

Commercialon® Premium Carpet Seam Sealer is a solvent free, non-flammable, high strength, universal seam adhesive that may be used on all J&J Industries products. This product is solvent-free, low odor and water resistant when dry.

## Glue Down Installations

Apply a 1/8" bead of Commercialon® Premium Carpet Seam Sealer along the trimmed seam edge that is first placed into the carpet adhesive. Apply the continuous bead where the face yarn enters the back. Complete the seam by butting the second seam sides to the sealed edge while the adhesive is still wet.

## Stretch-In Installations

Butter both trimmed seam edges in sufficient amount to cover both the primary and secondary backs at the point where the face yarn enters the back. Allow both seam edges to dry to the touch before running the seam iron.

- Approved Backings: Commercialon Premium Carpet Seam Sealer is a premium seam sealer recommended for sealing all J&J Industries broadloom carpet backings, as well as all sponge rubber and polyurethane backed carpets.
- Commercialon Premium Carpet Seam Sealer should be used on all direct glue, double glue, attached cushion, and stretch-in installations.

## Typical Coverage

400 linear feet per quart.

- White emulsion, dries clear
- Protect from freezing: Store inside at temperatures 50°–100° F.
- Maximum Shelf Life: One year warranty with proper storage conditions.
- Container Size: 1 Quart (US).

## Clean-Up

The seam sealer must be cleaned up immediately from the carpet surface using a white cotton toweling wet with water. Caution: Do not allow sealer to dry on carpet surfaces.
