

## NSF/ANSI 140-2010 The Green Carpet Standard

NSF International, a leader in standards development, product testing and certification, has been protecting health, safety and the environment for over 60 years. With over 10,000 clients in 100 countries and a worldwide auditor network, NSF is the preferred business partner for your sustainability solutions.

In November 2007, an ANSI approved Sustainable Carpet Assessment Standard, NSF 140, was successfully balloted. This standard is based on Life Cycle Analysis principles and allows specifiers and consumers to assess the environmental attributes of certified carpet products. NSF 140 Certified products can also contribute to innovation credits for LEED, a nationally recognized benchmark for the design, construction and operation of high performance green building systems.

NSF 140 recognizes sustainable carpet on three performance levels — silver, gold and platinum — using a rating system for performance and quantifiable metrics in public health and environment, energy and energy efficiency, manufacturing, biobased or recycled materials, reclamation and end of life management.

This is the first multi-attribute American National Standards Institute (ANSI) standard for environmentally preferable carpet.

With sustainability at the forefront of our process, J+J Flooring Group offers four advanced performance backing systems that are NSF/ANSI Standard 140 Certified.

### J+J Flooring Group Offers Four Certified Backing Systems

All of our backings feature Environmental Performance Technology<sup>®</sup> with environmentally conscious materials and advanced performance.

For more information or warranties, please contact your J+J Flooring Group Sales Representative or call 800 241 4586 x8020.
